NO MORE UNPLEASANT ODOURS

Neutralizing bad smells

Place / hang / attach pad in a space with bad smell. You can place it on top of a cupboard, in drawers, hang them on hangers or attach them behind doors.

The pad works continuously. If the pads gets dusty, wash in 40 °C to ensure that it keeps neutralizing odours.

SPECIFICATIONS

- Generic or 3 target versions (home, boat or car)
- 4 pads included
- Size pad: 200x150 mm
- Size package: 265x180 mm
- Pad: needle punched felt 300 g/sqm.
- Package: recyclable PE plastic bag with punchmark for easy hanging.

MOLD*

* Mold is a a warning odour. Longterm subjection to mold is a health hazard. Therefore we have designed Smellsfine to only minimize, not eliminate, the smell of mold.

Smellsfine anti-odour pads remove unpleasant smells such as smoke, sweat, trash, rubber, mold*, stinky food, urine, pets, vomit, petrol and vomit.

The effect is long lasting as the pad never gets saturated or "full". The effect can be noticed already after 10 minutes.

- 4 pads covers approx 20 m³
- 2 pads covers one car
- 2-3 pads covers one caravan

Number of pads required may vary depending on space, odour intensity and how fast you wish to remove the smell. The experience of smell may also vary from person to person.

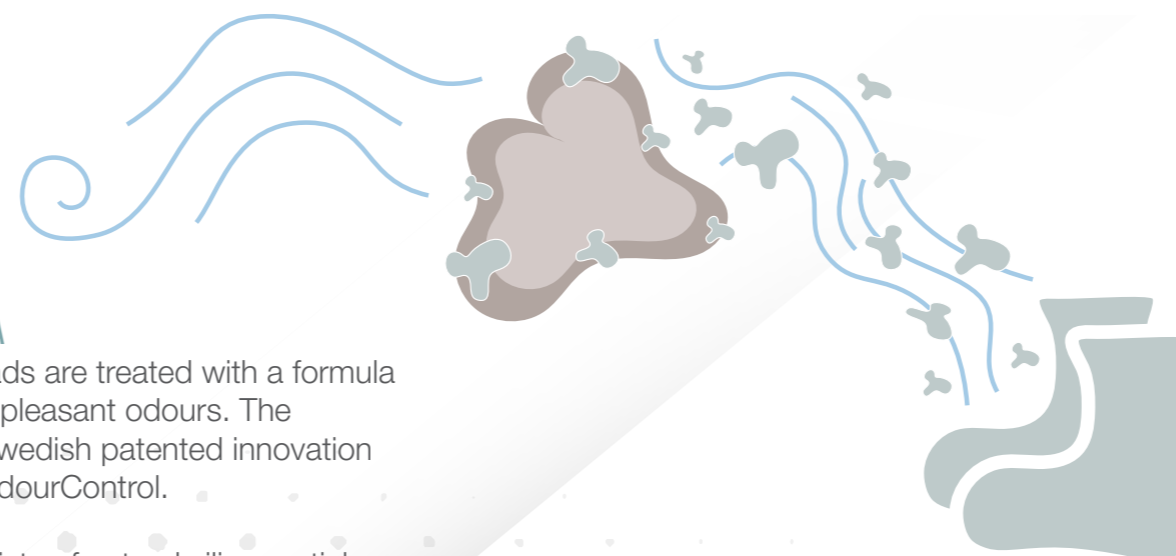

HOW DOES IT WORK?

PATENTED FORMULA

The Smellsfine pads are treated with a formula that eliminates unpleasant odours. The technology is a Swedish patented innovation called Prebona OdourControl.

The formula consists of natural silica particles covered in a coupling agent – a substance that will bind smelly particles in the air.

BINDS THE SMELLY PARTICLES

Odour particles release from a smelly origin, such as a sweaty sock. When they get in contact with the pads, the coupling agent will bind the particles to the silica.

NEUTRALIZED

The smelly particles is neutralized in a catalytic process. It means that the particles are destroyed and turned into non-smelly particles.

CONTINUOUS

The process is continuous and the pads are never saturated or "full". The pads can be washed if dirty or dusty without losing capacity.
